Experience

Rabobank

Senior Frontend Developer (Platform team)

September 2025 - PRESENT, Utrecht, Netherlands

Transitioned to the Platform team to enhance Developer Experience (DX) across the organization. Focused on improving internal tooling, streamlining application delivery processes, and supporting engineering teams in building, deploying, and maintaining scalable applications.

Rabobank

Lead Frontend Developer

January 2023 - September 2025, Utrecht, Netherlands

Part of area Customer Engagement. Responsible for features that are related to the online communication channels. In addition to my responsibilities as a Senior Front-End Developer I've started:

- Leading the group of Frontend developers within a few teams helping with feature development and reviews
- Participating in a cross team projects by helping to increase the delivery pace and code quality
- Participating in a cross team projects related to improvements of DX and internal code standards
- Share the knowledge with the teams and Frontend community within the bank

Rabobank

Senior Frontend Developer

November 2021 - January 2023, Utrecht, Netherlands

Part of area Customer Engagement. Responsible for features that are

related to the online communication channels.

- Applying best practices in coding by advocating for DRY and KISS principles, ensuring our codebase is both efficient and understandable
- Elevating code quality by implementing comprehensive Unit and E2E Testing, guaranteeing robust and reliable software delivery
- Influencing user experience through active participation in UX planning and crafting Proof of Concepts that shape our product's future
- Crafting and enhancing features using the Angular framework
- Diversifying my technical portfolio by developing backend BFF (Backend for Frontend) features, utilizing Java, Kotlin, and Spring Boot framework
- Ensuring code quality through code reviews, maintaining high standards of integrity and functionality

Tech stack: Angular/React.js, RxJS, Nx, Jest, Webdriver.io, TypeScript, JavaScript, Scss, HTML, NodeJS, NPM, Webpack, Git, Java, Kotlin, Spring boot

ZyLAB Technologies B.V.

Software Developer

OCTOBER 2019 - NOVEMBER 2021, Amsterdam, Netherlands

Part of R&D team.

- Working on frontend part of the new features for company's main project ZyLAB ONE,
- Supporting, refactoring and improving current code and features,
- Participating in grooming and discussions for the new features and future plans
- Solving small backend tasks with C# (.Net)
- Participating in code review
- Migrated the main project from Angular 6 to Angular 12, which helped to get rid of redundant dependencies and to be in line with the latest trends

Tech stack: Angular, RxJS, NgRx, Jasmine, TypeScript, JavaScript, Scss, HTML, NodeJS, NPM, Webpack, Git, C#, .Net

Solit-Clouds

Frontend Developer

APRIL 2017 - SEPTEMBER 2019, Moscow, Russian Federation

Worked on user interfaces for EMIAS (United Medical Information and Analytical System of Moscow).

- Developing interfaces and components according to Technical Issues and Users needs
- Developing components for internal UI-Kit
- Dealing with third party vendors for integrating services and external libs,
- Taking a part on planning sprints and tasks for them,
- Refactoring, bug fixing, code review,
- Migrating old projects from AngularJS to Angular 2+,
- Mentoring junior colleagues, helping with onboarding.

Tech stack: Angular, TypeScript, RxJS, NgRx, Webpack, npm, Git, StoryBook, SCSS, HTML, AngularJS, Mercurial, Gulp.

Inform Mobile

Frontend Developer

APRIL 2012 - APRIL 2017, Yubileyniy, Moscow Region, Russian Federation

As a Frontend Developer at Inform-Mobile I was mostly busy with:

- Developing user interfaces for mobile devices with native JavaScript, HTML and CSS
- Developing SPA for mobile devices and desktop with AngularJS
- Markup pages from PSD to HTML + CSS according to AWD / RWD techniques, using Mobile First Approach
- Integrating developed user interfaces to PHP projects

Tech stack: HTML (Pug), CSS (Scss), ES2015, AngularJS, Gulp, npm, Babel, Git

NBZ IT

Content manager

MARCH 2008 - APRIL 2012, Moscow, Russian Federation

As a content-manager at NBZ I was mostly busy with:

- Managing company's web resources and projects
- Preparing internet advertising at Google AdWords, Yandex Direct
- Making improvements to according to SEO techniques
- Creating banners and pictures for advertising and posts
- Translating from English interesting posts and articles and posting them on main company's resources
- Designing and marking-up HTML-mails (HTML + CSS) for company's announcements and events
- Designing and marking-up promo pages, websites with Photoshop, HTML, CSS and JavaScript (mostly jQuery) accordingly
